

A FREE GUIDE FROM SPOONFEDSTUDY

THE SLOT MACHINE HABIT SYSTEM

*Reverse-engineer the most addictive machine ever built...
and point it at the habits you actually want.*

If you can't stay consistent, the problem isn't willpower.
It's that your habits are less fun than your phone.

Your brain isn't motivated by **BIG** rewards.
It's motivated by

MAYBE.

THE CLASSIC EXPERIMENT (1930s → today)

A light. A button. A reward...
sometimes.

A GUARANTEED reward goes stale. An UNCERTAIN reward produces one of the biggest natural dopamine spikes ever measured... just shy of cocaine. The mouse becomes obsessed.

YOU ALREADY KNOW THIS IS TRUE.

Why is your phone so addictive? Why do slot machines eat casinos' rent? Pokemon packs. Monopoly stickers. Doomscrolling the news for the next outrage hit. Every addictive thing in your life runs on the same code.

PHONE

SLOT

POKEMON

MCDONALD'S

THE NEWS

Everywhere except the one place that matters:
YOUR OWN HABITS.

Your personal casino is THREE PHYSICAL THINGS.

Put them somewhere you can see every day. Visibility is half the magic.

PIECE 01

THE WHEEL

your spinning reward engine

A digital spinner from wheelofnames.com, pre-loaded with the exact Tier 1 / 2 / 3 / Bonus / Jackpot split.

T1 40% T2 30% T3 20%

BONUS 8% JACK 2%

PIECE 02

THE CLIPS

6 colors. Plus one gold.

Draw ONE paperclip each time you do your habit. Match colors to 'cash in' for bigger reward tiers. Land the gold clip? Instant Tier 3.

PIECE 03

THE JAR

your long-game prize ladder

Each clip = \$1 into a fund. Draw 3 lines on your jar: mini prize, mid prize, moonshot prize. Fill the jar = Europe trip.

SHOPPING LIST — grab these, then you're ready:

Glass jar (1 gal) →

6-color paperclips →

Gold paperclips →

Pro tip: Use 3 jars for 3 habits (fitness / brain / side-hustle) — each with its own prize ladder.

THE CORE LOOP — every time you do the habit:

CASHING IN — how clips unlock bigger tiers:

0 CLIPS

→ TIER 1 only

2 MATCHING CLIPS

→ TIER 2 unlocked

3 MATCHING CLIPS

→ TIER 3 unlocked

1 GOLD CLIP

→ TIER 3 — instant

NEAR MISS!

Even 'losing' spins drift past Tier 3 — your dopamine spikes anyway. That's the whole point.

THE 3 REWARD RULES — pick rewards that obey all three:

#1

HIGHLY ADDICTING

Thinking about it should give you a rush. If it doesn't spike your dopamine on its own, it won't power the system.

#2

TIME OR MONEY WASTING

Pick something you regret: doomscrolling, phone games, takeout. You want the system to REDUCE this.

#3

THE NAKED RULE

Never do this reward 'naked' again — only through the system. Otherwise the casino is irrelevant.

BONUS ROUND Land on BONUS? 10-minute timer starts. Do a little bit more for a discounted spin.
The 'just a little bit more' principle — chain streaks + earn extra paperclips.

Land on BONUS? A second wheel appears.

Slot machines invented this exact mechanic — a second game-within-the-game to keep you engaged just when predictability would've killed the thrill. Here's what each segment does.

THE BONUS WHEEL

Bigger slice = more likely to land

FIVE SEGMENTS:

75%

Smallest discount. Most common.
Do 75% of the habit → earn the paperclip.

50%

Half off. Still do half.
Do 50% of the habit → earn the paperclip.

25%

Big discount. Rare.
Do just 25% of the habit → earn the paperclip.

FREE

The rarest win.
No habit needed. Take a free paperclip.

EXTRA

The streak-maker.
Re-spin bonus wheel TWICE. Chain up as many clips as you can.

10:00

THE 10-MINUTE RULE

Spin the bonus wheel, and a timer starts.

You have exactly 10 minutes to complete the discounted habit. Miss the window? No paperclip. No streak. Keep whatever you'd already earned from your original spin.

One session. Three paperclips or more!?

Here's the walkthrough George used in the video — habit = 15 burpees. Follow the chain.

01

Do 15 burpees. Spin the main wheel.

You cashed in 2 matching clips so Tier 2 is active. The wheel slows down... and lands on BONUS.

CASHED

EARNED

BONUS LANDED

02

Auto-collect Tier 2. Spin the bonus wheel.

You get your Tier 2 reward for free. Now spin the bonus wheel. It lands on 50%. Timer starts — 10:00.

CASHED

EARNED

50% — DO 6 MORE

03

Do 6 more burpees in 10 minutes.

Because you JUST did 15, what's 6 more? That's the 'just a little bit more' trick. You earn +1 paperclip AND re-spin the main wheel.

CASHED

EARNED

+1 CLIP → BONUS AGAIN

04

Second bonus lands on EXTRA SPIN.

You get TWO more bonus rounds in a row. Another discount. Another timer. Potentially 2 more paperclips in a single session.

CASHED

EARNED

MAX STREAK → ∞

THE PSYCHOLOGY BEHIND IT

The 'just a little bit more' principle.

Your brain evaluates effort relative to what you JUST did. Right after 15 burpees, 6 more feels like a steal — even though you'd never do 21 back-to-back without the system. Same trick slot machines use to pull 'one more spin' out of gamblers.

21 > 15 ... and it doesn't even feel like it

1 You miss the 10-min timer.

No paperclip. Streak ends. Keep the original spin's reward and move on. The casino doesn't care — tomorrow's a new session.

2 Your clips don't match colors.

Stay at Tier 1 while you accumulate clips. When you have 2 or 3 of the same color, cash them in to activate the higher tiers. Gold clips short-circuit this — one gold = instant Tier 3.

3 You do the habit before the spin.

Fine. Doing the habit is always step one. The spin is just the reward engine. The order is: DO → GRAB → CASH → SPIN.

4 You want to stack multiple habits.

Use multiple jars to keep track of multiple habits. Each one acts as a progress bar for that particular habit. Fill them up with their own paperclips for massive rewards!

AT A GLANCE — THE WHOLE SYSTEM ON ONE LINE

HABIT → GRAB → CASH → SPIN → (maybe) BONUS → streak.

● TIER 2 = 2 matching clips

● TIER 3 = 3 matching OR 1 gold clip

● BONUS wheel timer = 10 minutes

● Max streak = ∞

PRO TIP — Keep a stopwatch on your phone pinned to the lock screen.

One-tap access = zero friction = more streaks.

Your wheel — pre-built.

You just need to upload it.

HOW TO IMPORT YOUR WHEEL (30 seconds)

01**Go to wheelofnames.com**

Open a browser and head to the site. It's free — no login needed.

02**Import the .wheel file**

Gear icon → Customize → Advanced → Import → pick the .wheel file I sent you.

03**Hit SPIN and play**

Your wheel is now pre-loaded with the exact probabilities from this guide.

← **READY TO SPIN**
(this is what you'll see)
